

SOFTWARE QUALITY ASSURANCE ENGINEER (SQAE)

This is an exciting role in a fast-growing company. We are seeking an enthusiastic, technically sound and confident candidate to join our talented software engineering team and help us improve quality assurance. In this role, you will be the guardian of our outstanding customer experience.

JOB RESPONSIBILITIES

QA Testing

You will help us in ensuring that all of our customers have an amazing experience with our products. In order to achieve this, you will be required to fully test, evaluate and thoroughly examine our developed work products (websites, mobile apps, software packages etc). You will be expected to follow the industry best practices and techniques and to maintain the desired level of quality of work. You will be required to rigorously test, identify and report bugs and issues and also to follow up and validate each issue upon applying fixes, until it is completely resolved.

QA Planning, Documentation and Reporting

You will be required to plan, document and report your QA testing activities on an on-going basis. You will be expected to write detailed test cases, devise testing scenarios for end-users and also to compile detailed testing reports, which our development team and customers can benefit from. Since we have a number of simultaneous projects going on at any given time, you will be expected to plan and manage the testing of multiple projects.

Requirements

- A passion for technology and a knack for details
- The ability to create test plans, define testing strategies, and a driven attitude for uncovering those hard-to-find bugs
- Good communication and documentation skills
- Knowledge of Quality Assurance and its significance in the Software Development Life Cycle
- Ability to work well with people from many different disciplines with varying degrees of technical experience
- Ability to adapt to a dynamic, rapidly changing business and technical environment
- Ability to maintain confidentiality
- At least a bachelor degree, in a technical field for example Computer Science or IT
- Preferred, but not mandatory, at least 1 year experience in a similar role
